ONBASE TIPS AND TRICKS

Browser Compatibility

For up-to-date browser compatibility, please refer to <u>www.emporia.edu/onbase</u>.

- FireFox
- Chrome
- Internet Explorer (only if you perform the Web Client Setup Guide and Tools found at the link above.)

How to get to OnBase

OnBase is accessible from anywhere in the world as long as you have internet. If you are offcampus, when prompted for a login, you may need to use **esuad**\ (backslash) in front of your userid.

Enter ESUAD\Userid:	esuad\chornet	×
Password:		

- Click an OnBase link in your email.
- Hornet365
- <u>www.emporia.edu/onbase</u> click the first link to auto-login.
- Unity Client Install by clicking the link at the bottom of <u>www.emporia.edu/onbase</u>. (Mac users can't install, but may use SkyLab.)
- SkyLab Use

https://www.google.com/url?q=https%3A%2F%2Fskylab2.emporia.edu%2FRDWeb%2FPa ges%2Fen-US%2Flogin.aspx%3FReturnUrl%3D%2FRDWeb%2FPages%2Fen-US%2FDefault.aspx&sa=D&sntz=1&usg=AFQjCNEDmcekJZyTEZViQLvOxWpJOlPCGg if

like the features of SkyLab or are traveling and don't have a personal computer. If you prefer the Unity Client or also want access to work email, use the Employee Desktop.

Document Retrieval

- Search the **Vendor Name** field by typing any part of the vendor name, then click the drop down arrow.
- ***** is the wildcard in all other fields. In this example search for "stipend" in the Commodity Description.

AP Commodity Desc	=
stipend	

Use an * before and after the word in case there are other characters before or after the word I'm searching on.

 Search one or more document types at one time by holding the CTRL or Shift Key when selecting. Ex: Search <u>AP Invoice Approval</u> and <u>AP Purchase</u> <u>Requisition</u> by a particular vendor or index. Or search <u>AP Invoice Approval</u> and <u>FAC - Service</u> <u>Request by the same index number (Keyword name for</u>

- <u>Request</u> by the same index number (Keyword name for index is Banner ACCI).
 Search by various keywords: PR# <u>= Banner Document ID</u>; UserIDs (<u>Banner UserID AFKW</u> <u>SKW</u>, <u>Office Manager UserID</u>, <u>Banner UserID NextRoute</u>, <u>SYS Security UserID</u>...); <u>Vendor</u> <u>Name</u>; <u>Banner First Name</u>; <u>Banner Last Name</u>; <u>AP Status</u>; index = <u>Banner ACCI</u>....
 - Press F6 in a Keyword field to create more than one occurrence of the keyword. Be sure to use AND to QR as desired, by clicking.

• Find all PRs that are not PAID

AP - Purchase Requisition	.

0	Find all Foundation D	irect Pay			. Index

- accounting information are removed on Direct Pay Invoice Approvals.
 Find all Infrastructure, Equipment, Contracts, and Encumbrances the same
- way.

and

 Whatever criteria you have searched by, you will get a hit list of documents.
 If you need to print that list or save it to Excel, right click the list, select <u>Create List Report</u>. That brings up this decision box:

Range

If you don't see the <u>Create List Report</u> option and you need it, call Patty or Skylar.

Workflow

If you only use email links to get to workflow, there is another way! Once you are in OnBase, click the hamburger menu, then Open Workflow.

W	ORKFLOW
	Open Workflow

Route

Cancel

to

Oth

If you use the link in an email to get to workflow, you can't get to document retrieval. The link only brings up workflow. If you open OnBase without using an email link, you

see this arrow \leftarrow that takes you to Document Retrieval.

- Life Cycle View displays all of all the workflows, and you will only see ones you have access to. Click here to change workflow or workflow gueues.
- Work Folder will show related documents, if any (ex: Invoice Approval, Invoice, PR, quote, bid, PO...)
- Save • If you change anything on a form in workflow, you must click the button.
- If you want to Route the document or move it along thru workflow, you must click the Route to

Approvers

task icons at the top, like these:

- For Purchase Requisitions, of the icons listed above for the PR Originator workflow queue, you would nearly always want to click Route to Approvers.
 - The case for entering Route to Other would be when someone doesn't know 0 enough information to complete the form, and you want to pass it to the person with more information.
 - You could also use Route to Other if you had applicant interview expenses that HR would be paying, and you don't know their index or ORGN number.
 - You would not use Route to Other if you completed the form and wanted to 0 pass the document to the next approver.
 - Route to Approvers knows if you need more department approvals or if the document needs routed to Purchasing, Grants, Foundation, IT or for any other approvals.
- The PR Waiting for Invoice workflow queue is very important! It contains all your unpaid PRs. Make sure that Invoices have a PR number on them if they are associated with a PR. There is no action to take in the queue. When the PR is paid, the PR will automatically exit this gueue and exit workflow.

History - aka "Where is it?" and "Who did it?"

You can see History from Document Retrieval and Workflow by left clicking the item (blue), then rightclick, select History.

AKA Marketing and Promotions LLC - To Vendor \$244.75 Reeves-Wiedeman Co. - PART-PAID \$3,350.00 Kansas Security, LLC - PART-PAID \$1,390.00

History might look different to you if you clicked a link in email to go to workflow. The Document History tab shows all changes to the form, keywords that were deleted or added, when anyone saved the document, anyone who viewed the document.

• <u>Workflow Queues</u> tab shows all the workflow queues the document has been in, which queue it's in now, and who released the document from each queue. If you don't think your document is moving along quick enough, you can check here to see where the hang-up is.

ocument History Workflow Qu	ueues Workflow Transactions

AP Purchase Requisition	Foundation PR Approval	RGEHRKE	6/12/2014 11:15:50 AM	RGEHRKE
AP Purchase Requisition	Dept PR Approval	LSEADER	6/11/2014 3:38:08 PM	RGEHRKE
AP Purchase Requisition	Initial	LSEADER	6/11/2014 3:38:05 PM	LSEADER

This PR was started on 6/11/2014, finished department approvals on the 12th, approved by Purchasing and the Controller on the 16th, and entered into Banner automatically (EISSERVICE) on the 16th. It is currently waiting for invoices. The documents pass thru all the workflow queues, but where the entry date is the same for multiple queues, the document didn't need to perform any work in that queue, so immediately moved on. (In the above example, it didn't need FAC, Technology, Infrastructure, Equipment or Contracts.)

Cross References

• If you are looking at a document and want to see all related documents, right click on the document or on the hitlist, then click Cross References. For this PR there are multiple documents: PR, PO, Bid and multiple Invoice and Invoice Approvals.
